EDUCATION

Vellore Institute of Technology
B.Tech., Computer Science
CGPA: 8.76

Chennai, India
8/2023 - 7/2027

PROJECTS

Sakhi (Personal Project) | 04/2025 – Present

- Developed a full-stack women empowerment platform featuring secure JWT-based authentication, role-based access control (User/Admin), responsive UI, and RESTful APIs using React, Node.js, Express.js, and MongoDB.
- Built multiple end-to-end modules including a Job Portal, **Sakhi Academy** (Learning Hub), Community Forum, Government Schemes Explorer, User Profiles, and Safety Center with reusable React components and scalable backend architecture.
- Implemented dynamic features such as course enrollment and progress tracking, job applications, bookmarking, search and filtering, profile management, and CRUD operations for users and administrators.
- Designed the application with a modular, production-ready architecture following clean coding practices, responsive design principles, protected routes, and a scalable foundation for future AI-powered career guidance and personalized government scheme recommendations.

Annadaata: Autonomous Rover & Drone System for Agriculture, Smart India Hackathon (SIH) Finalist 12/2025

- Led automation design for autonomous agricultural rover, coordinating control across multiple electromechanical subsystems.
- Designed and integrated a solar tracking “sunflower” mechanism to optimize energy harvesting.
- Developed an automated sprinkler system enabling controlled water dispersion based on predefined field coverage logic.
- Contributed to rover’s electrical architecture, power distribution, motor interfacing, actuator control, safety considerations.
- Supported system-level integration to ensure reliable coordination between mechanical, electrical, and control components.

CrickSolve (Personal Project) 11/2025 – Present

- Built a Wordle-style daily cricket guessing game using HTML, CSS, JavaScript and React, deployed on GitHub Pages.
- Implemented dataset-driven gameplay for 423 cricketers, including autocomplete search, daily puzzle generation, and strict guess validation.
- Designed an interactive hint system with attribute unlocking, numeric comparison indicators (↑/↓), streak tracking, and local Storage-based daily progress persistence.
- Added a polished game flow with welcome/rules modals, bonus guess logic, player image rendering, and shareable premium-style results.

ACHIEVEMENTS

VIT Chennai: Code for a Cause Competition 01/2024

Chennai, India

- Secured 3rd rank in the coding competition focused on solving real-world problems using programming skills.
- Developed innovative solutions and algorithms to address various challenges posed during the competition using Python and Java, including optimization problems, data analysis tasks, and system design issues.
- Collaborated with a team to enhance problem-solving and coding efficiency, participating in pair programming exercises.
- Presented the final project to a panel of judges, detailing the approach, implementation, and impact of the solution.

Agentic AI Specialization (IBM SkillsBuild) | 06/2026

- Completed hands-on training in Agentic AI, building intelligent agents using LangChain, LangGraph, CrewAI, AutoGen, MCP, and A2A protocols.
- Developed **RAG-based chatbots**, tool-calling agents, and multi-agent workflows using **Ollama**, **FAISS**, and local LLMs for autonomous task execution.
- Implemented advanced agent architectures including **ReAct** and **ReWOO**, enabling reasoning, planning, retrieval, and dynamic tool orchestration.
- Built end-to-end AI applications including a **Smart College Assistant**, **HR Recruitment Assistant**, and **AI-Powered Customer Support Automation System**, leveraging vector databases, RAG pipelines, and agent workflows.

SKILLS

- Languages:** Python, Java, C, C++
- Frontend:** HTML, CSS, JavaScript, React, Next.js
- Backend:** Node.js, FastAPI, Django, Flask
- Databases:** PostgreSQL, MongoDB, Firestore
- Real-Time & Caching:** WebSockets, Redis
- Tools:** Git, GitHub, Postman, Linux

- **Deployment:** Vercel, Render, Firebase Hosting
